This full-day session will include three topics, wrapped around the theme of performance auditing in government. Beginning with a discussion of audit planning, we'll discuss how to link audit risks to the available resources in our audit organizations. Second, we'll explore tools to make performance auditing more efficient through each phase of the audit process. Finally, we'll discuss techniques to communicate our audit results to decision-makers.

Audit Planning -- Linking Risk to Resources. This session explores audit planning at both the "macro" (annual plan) and "micro" (audit engagement plan) level, equipping participants with tools and techniques to study and apply risk to their overall and audit-specific

Presenting Audit Results to Decision-Makers. This session studies ways to convey audit information to non-audit leaders and the public, ranging from specific techniques to the general theories that make audit details more effective when communicated.
